

Assemblymember Nowers

I move the following amendment to Ordinance Serial No. 21-076 and IM No. 21-155 and revise the total dollar amounts throughout the Ordinance including the title and ballot proposition:

Remove Project No.6: Inner-Outer Springer Loop Pathway - \$1 million

The Manager has proposed to remove this project which was initially listed at a cost of \$1 million. The project would provide a valuable connection between two existing pathways in the heavily populated area surrounding Palmer near the Alaska State Fairgrounds. The Manager's notes, however, indicate the project is not within an RSA, could involve expensive utility relocation, is within an AK Department of Transportation Right-of-Way, and there is no maintenance agreement with the City of Palmer or State. Removing this project helps lower the total amount of the transportation systems package.
